Risks of the WEB

The internet can be a dangerous neighborhood for everyone, but children and teens are especially vulnerable. From cyber predators to social media posts that can come back to haunt them later in life, online hazards can have severe, costly, even tragic, consequences. Children may unwittingly expose their families to internet threats, for example, by accidentally downloading malware that could give cyber criminals access to their parents' bank account or other sensitive information. Protecting children on the internet is a matter of awareness—knowing what dangers lurk and how to safeguard against them. Although cyber security software can help protect against some threats, the most important safety measure is open communication with your children.

CLICK HERE IT IS NOT A VIRUS

Using e-technology to bully people has become an increasing problem in recent years with over a third of young people having being affected at least once. There has been a massive increase in online bullying due to the use of social media such as Twitter or Facebook, which is easily accessible through mobile devices as well as computers.

Examples include:

Posting negative comments on someone's Facebook/Twitter site

Taking on someone's identity on the web to humiliate them

Harassing someone via their mobile phone/social media.

Staff should be aware of the risks and check that any technological devices children use are secure and have the relevant security installed. Children may be enticed to access certain websites with the offer of special offers and prizes. They should report any concerns to a line manager immediately.

The internet is the perfect place for child predators to find victims because they can disguise their identities and talk to children privately. Because it's so popular with minors, Instagram is the site most used by child predators.

As Naomi from Zift in the below video explains, teenage use the platform as a “digital diary,” sharing information phone numbers, email addresses, and even their exact Instagram posts are publicly viewable by default:

Instagram users tend to such as their full names, locations. Additionally,
