

SOCIAL MEDIA MANIPULATION

WARM-UP ACTIVITIES

> AIM:

- to raise awareness among teenagers / students and society in general about how social media can sometimes manipulate us.
- to reflect on how this manipulation affects us directly

> ACTIVITY 1:

You must prepare a simple questionnaire (2 or 3 questions) in order to get information about social media manipulation. For example: "Have you ever felt manipulated by social media?", "How have you ever realised you were being manipulated?", etc..

Now, you must question some people around you and transfer all the information into a chart (pie, bar, columns).

To finish, you must analyse the results and compare them with the rest of the participants.

> ACTIVITY 2:

Look for a social media post / story / tweet with which you have felt manipulated.

Take a caption or digital record of the post / story / tweet and describe:

- In what sense have you felt manipulated? Give as many details as possible.
- What do you think is the reason for this manipulation?
